BRIEF DESCRIPTION OF INSTITUTION

The University of Central Florida (UCF) is a public metropolitan research university invested in unleashing the potential within every individual; enriching the human experience through inclusion, discovery and innovation; and propelling broad-based prosperity for the many commu

nities we serve. Founded in 1963 to provide talent for the U.S. space program, UCF has positively impacted the state, nation, world — even outer space — ever since. Our world-class faculty bring academic and industry expertise to the classroom, as well as innovative research, as they educate and inspire a new generation of talent to fuel America's economy and solve the world's greatest challenges. Located in Orla

Institutional Information

Year of Data: The GRUP Survey collects information for the most recent two years from participating institutions, if available. Institutions that have not participated in previous GRUP surveys are also welcome to provide data for the past three years, please contact us via grup@shanghairanking.com.

FTE Number: The numbers of staff or students should be provided in Full Time Equivalent (FTE), unless otherwise specified. The formulas of calculating FTE are as follows:

FTE number of academic staff: $FTE = \text{the number of full-time academic staff} + (\text{the number of part-time academic staff} * \text{the FTE conversion factor})$. The FTE conversion factor is calculated as the total hours worked by part-time staff divided by the number of hours in a full-time schedule. For example, if part-time staff work on average for one-third of the statutory hours of full-time staff, then the FTE conversion factor is 1/3.

FTE number of students: $FTE = \text{the number of full-time students} + (\text{the number of part-time students} * \text{the FTE conversion factor})$. The FTE conversion factor is calculated as the course load generated by part-time students during the reference period divided by the normal course load during the reference period.
